Get RainReady with NATIVE PLANTS

In RainReady communities, better water management means that homes, schools, and businesses are prepared for rain—whether too much or too little. RainReady programs keep residences secure and dry, services running, and rivers and lakes clean.

WHY PLANT NATIVE PLANTS AT HOME?

- Native prairie, woodland and wetland plants have evolved to thrive in our natural conditions and, after the first season or two of establishment in your yard, typically require less maintenance than a conventional lawn or garden.
- Native plants do not require chemical fertilizer or pesticides and can save you money in the long-term, while helping the environment.
- Native plants can be quite beautiful and lend your backyard a sense of place rooted in natural history, while providing food and shelter for birds and beneficial insects (e.g. dragonflies that eat mosquitoes).
- Native and other deep-rooted plants help direct rainwater into the soil and if planted in a rain garden in conjunction with a disconnected downspout, native plants are especially effective for managing stormwater.

WE CAN HELP!

If you or your community are interested in getting RainReady, CNT staff members are available for presentations and for case-by-case technical assistance. Our presentations explain the benefits of rain readiness and outline their key elements, including needs assessments, financing, and supportive policies.

For more information visit rainready.org or contact info@rainready.org.

DID YOU KNOW?

LAWN IRRIGATION CAN ACCOUNT FOR AS MUCH AS 30% OF A TYPICAL RESIDENT’S WATER USE.

NATIVE PLANTS REQUIRE LESS IRRIGATION AND ACTUALLY HELP REDUCE STORMWATER RUNOFF.

LOCAL EXAMPLES OF NATIVE PLANT LANDSCAPING

- Peggy Notebaert Nature Museum Prairie - 2430 N Cannon Drive
- McCormick Center Butterfly Garden - 2301 S Lake Shore Drive
- Northerly Island - 1400 S Lynn White Drive
- North Park Village Nature Center - 5801 N Pulaski Road
- The Lurie Garden at Millennium Park - 201 E Randolph Street
- Lincoln Park Zoo - 2001 N Clark Street

RECOMMENDED NATIVE PLANTS FOR CHICAGO

With these things in mind, ask your local garden center experts which kinds of plants will work best for you. Here are a few common situations and the plants that will thrive under those conditions:

<table>
<thead>
<tr>
<th>Common Name</th>
<th>Scientific Name</th>
<th>Type</th>
<th>Notes</th>
<th>Soil Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Meadowsweet</td>
<td>Spiraea alba</td>
<td>Shrub</td>
<td>White flower clusters bloom early in summer</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Northern Sea Oats</td>
<td>Chasmanthium latifolium</td>
<td>Grass</td>
<td>Beautiful seed heads for cut and dried arrangements</td>
<td>Most and well-drained to dry</td>
</tr>
<tr>
<td>Switch Grass</td>
<td>Panicum virgatum</td>
<td>Grass</td>
<td>Lacy sprays, grass turns yellow in fall</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Little Bluestem</td>
<td>Schizachyrium scoparium</td>
<td>Grass</td>
<td>Ornamental grass forms very dense mounds</td>
<td>Most and well-drained to dry</td>
</tr>
<tr>
<td>Nodding Wild Onion</td>
<td>Allium cernuum</td>
<td>Flower</td>
<td>Pink flower clusters no to ground, bulbs can, be used raw, boiled, pickled or as seasoning</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Butterfly Milkweed</td>
<td>Asclepias tuberosa</td>
<td>Flower</td>
<td>Bright orange flowers are loved by butterflies</td>
<td>Most and well-drained to dry</td>
</tr>
<tr>
<td>New England Aster</td>
<td>Aster novae-anglia</td>
<td>Flower</td>
<td>Showy, bright purple or white flowers have orange centers</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Pale Purple Coneflower</td>
<td>Echinacea pakkuda</td>
<td>Flower</td>
<td>Pale petals drop from large cone-shaped center</td>
<td>Most and well-drained to dry</td>
</tr>
<tr>
<td>Purple Coneflower</td>
<td>Echinacea purpurea</td>

<td>Popular native, long-lasting lavender flowers</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Kattesnake Master</td>
<td>Eringium urticatum</td>
<td>Flower</td>
<td>Tough stems support balls of white flowers</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Blue Flag Iris</td>
<td>Iris virginica</td>
<td>Flower</td>
<td>Fragrant blue-violet flowers</td>
<td>Wet to moist and well-drained</td>
</tr>
<tr>
<td>Blazingstar</td>
<td>Liatris spp.</td>
<td>Flower</td>
<td>Striking, long purple flower heads</td>
<td>Tolerant of most soils</td>
</tr>
<tr>
<td>Virginia Blue Bells</td>
<td>Mertensia virginica</td>
<td>Flower</td>
<td>Lovely blue flowers, great for under trees</td>
<td>Most and well-drained</td>
</tr>
<tr>
<td>Wild Bergamot</td>
<td>Monarda fistulosa</td>
<td>Flower</td>
<td>Flowers of lavender or pink, poms, plant parts used for tea</td>
<td>Tolerant of most soils</td>
</tr>
<tr>
<td>Purple Prairie Clover</td>
<td>Pedalostenum purpureum</td>
<td>Flower</td>
<td>Beautiful in bouquets, flowers attract butterflies and bees</td>
<td>Most and well-drained to dry</td>
</tr>
<tr>
<td>Mayapple</td>
<td>Podophyllum peltatum</td>
<td>Flower</td>
<td>Spring bloom of apple-blossom like flower</td>
<td>Most and well-drained</td>
</tr>
</tbody>
</table>

Symbol Key:
- Rain garden plant
- Beneficial to birds + butterflies
- Full sun
- Partial sun
- Full shade
WHAT TO DO BEFORE YOU PLANT

There are many varieties of native plants available through Chicago’s local garden centers and nurseries. Much like planning any other type of landscaping, you should take stock of your backyard resources before deciding which plants to buy:

✓ How much sun do you get in your backyard?
✓ What is the soil like?
✓ Are there any low areas that tend to collect water during rains?
✓ How much space is available for adding new plants?
✓ Can you remove some of your turf grass to make more room?

HOW TO CARE FOR YOUR NATIVE PLANTS

Every species and variety of native plant has a different set of needs, so be sure to speak with the experts at your local garden center when you make your purchase. In general, deep-rooted perennials will need some time to establish themselves. You should be ready to provide extra care through watering and weeding during the first season or two, depending on the variety you have selected.
UNDERSTANDING YOUR SITE

LAYOUT
Take a good look at your site. Note the placement of existing plants and trees, paved areas, buildings and power lines. Take a few days to monitor which areas get full or partial sunlight and take note of low spots that tend to collect water during rain storms.

SOIL
Determine your soil type before you purchase new plants or trees and check with your local garden center for species adapted to your soil type. If you are planning to grow vegetables, build a raised bed or have your soil tested to ensure it is safe for growing vegetables.

SUN
Before you buy new plants or trees, be sure to note the sunny and shady areas of your yard. Each species has its own sunlight requirement and should be planted accordingly. Look for opportunities to use trees for shading a seating area or the windows of your home.

SUSTAINABLE LANDSCAPING TIPS
- Use locally-sourced and recycled materials where possible.
- Avoid impermeable surfaces. Utilize permeable materials where possible.
- Use homemade compost instead of store-bought fertilizers.
- Practice Integrated Pest Management instead of applying pesticides.
- If you choose to keep a lawn, utilize natural lawncare practices.
- To maximize energy savings, strategically plant trees to serve as wind-blocks in the winter and shade your home in the summer.
- See www.chicagohomecomposting.org and www.landscapeforlife.org for more information.
